

SPRAYPOND CHEMICAL

ALGAESIDE CHEMICAL

❖ APPLICATION

It is a high potency liquid microbicide, designed to control the growth of algae and bacteria found in open recirculating cooling systems. It also provides a detergent action that cleans dead growths from cooling systems. This product is effective throughout the pH range of 6.5 to 9.5

❖ ADVANTAGES

- ❑ Read – to – use liquid
- ❑ Compatible with standard cooling water
- ❑ Easy to handle and feed
- ❑ Economical to use
- ❑ Detergent action
- ❑ Highly effective.

❖ FEEDING

It should be fed at full strength in the cooling tower basin at a point of maximum water circulation. Tower bleed off valves should be closed to permit a retention time of 4 hours.

❖ HANDLING

Keep the container closed when not in use. The product should be not be swallowed and prolonged contact with the skin should be avoided. Wear of goggles or face-shield and rubber gloves are recommended while handling this product. Do not discharge the treated effluent into lakes, streams or public water as the product is poisonous to fish

❖ **TECHNICAL DATA**

- ❑ Colour : Straw Yellow.
- ❑ Specific Gravity : 0.99 @ 25°C
- ❑ pH : 8.2
